Hardwax-oil FF

Hardwax-oil FF

The market is increasingly asking for a combination of oiled floors with lacquer. The Floorservice systems are certainly suitable for this. But what about a fully oil-treated floor with the properties of a varnished floor? This effect is achieved with the Floorservice Hardwax-oil FF. This product must be applied in 2 layers, whereby, if desired, 1 color layer is applied and buffed in and the 2nd transparent layer is rolled on with a paint roller. Floorservice Hardwax-oil FF ensures a sustainable refinement of the wood and guarantees a wear-resistant surface. The natural wood is revived and, depending on the gloss level used, takes on a satin or matt appearance. With a faster drying time and more film formation, this oil distinguishes itself from our natural Hardwax-oils, such as 2K, Classic, Pro and Profiline. Neutral and natural colors are rendered perfectly transparent by this Hardwax-oil FF.

The colors displayed are examples of primers in combination with coloured Hardwax-oil on oak rustic. The look and feel and therefore the end results strongly depend on the type of wood, the sorting and the pre-treatment of it. Because wood is a natural product, these colors may vary. We recommend you carry out a test beforehand, in order to determine the color.
