

FEEL THE RESULTS

A NEW RANGE OF DIAMOND TOOLS FOR SURFACES AND FLOORS

FROM THE COMPLETE PARTNER IN SURFACES AND FLOORS

BRING YOUR SKILLS TO THE SURFACE

Where others see a hard surface, we see something else: potential.

Everyday surface and floor materials – like concrete, stone and wood – are just waiting to be made into something extraordinary. With your skills and our diamond tools, it's possible to bring their inner harmony and beauty to light.

Let us help you transform any surface with ease. Simply choose your Husqvarna diamond tool – and feel the results.

WELCOME TO A SMOOTHER WORKDAY

FROM START TO BEAUTIFUL FINISH

When it comes to demanding jobs, we know that even small interruptions can take a major toll on your productivity. Shouldn't your workflow be as smooth and effortless as the finished result?

To streamline your day, we've brought together the best diamond tools from the world's three leading brands – Husqvarna, HTC and Blastrac – into one complete range.

And there's no question: with this new range you can expect an unparalleled surface preparation experience. Whether you're removing a previous treatment, grinding,

polishing or edging – now you can flow through every step of the job with ease.

It's all part of our commitment to be your complete partner in surfaces and floors. Count on us to deliver the machines, chemicals, floor solutions and diamond tools you need – along with the quality, performance and results you're looking for. Every time.

A close-up photograph of a worker's hands, wearing dark gloves, holding a specialized diamond tool. The tool has a central metal body with several blue, diamond-tipped heads. The worker is wearing a high-visibility green and blue safety vest over dark work pants. The background is blurred, showing what appears to be a large, curved surface, possibly a piece of machinery or a large wheel.

**WHEN IT COMES TO SURFACE
PREPARATION AND REFINEMENT,
DIAMOND TOOLS ARE WHAT MAKE
THE DIFFERENCE BETWEEN A
GOOD RESULT – AND A GREAT ONE.**

ONE ALL-STAR LINE-UP

EVERYTHING YOU NEED IN ONE PLACE

From one trusted source, you can now get all the removal, grinding, polishing and edging tools you need for every step of the job.

COATING AND ADHESIVE REMOVAL

Remove various types of coatings and obtain a clean surface with efficiency and precision.

CONCRETE GRINDING

Efficiently grind and prepare concrete floors of varying hardness levels. Achieve smooth and exposed surfaces with a consistent scratch pattern.

POLISHING

Resin tools for honing and polishing concrete surfaces. Achieve high DOI (Distinctness Of Image) and low Ra (surface roughness) values, effortlessly.

A CHANGE FOR THE BETTER

We're proud to present this complete diamond tool range. It's the result of two years of intensive market and product research – as well as 100 years of combined experience from the world's three leading brands. Here's why this range is the best choice for every job.

WIDEST OFFERING TO TACKLE ANY SURFACE

We are a global player with a heritage like no other – and the most complete offering to tackle any surface, from extremely abrasive floors to the hardest concrete, as well as special applications like natural stone and wood.

EASIER TO CHOOSE AND USE

Whatever the application, our new line-up offers an easy solution. It's easy to find what you need, thanks to a new colour system that helps you identify each tool's grit size, as well as a new naming logic that clearly indicates each tool's performance level, application and action.

The range is also easy to use, since all our metal tools and ELITE resin tools now feature the popular EZchange™ attachment system, which makes changing tools effortless.

ALWAYS THE RIGHT PERFORMANCE

You can be sure of getting the right performance for your needs at every step of the job. Choose from three performance levels: ELITE, VARI and TACTI, represented by the colours Gold, Silver and Bronze, respectively.

PLASTIC-FREE PACKAGING

Our ambition is to minimise our environmental impact and help reduce the use of plastic and waste at the construction site. All our diamond tools therefore come in appropriately sized packaging made from 100% recycled cardboard. For added convenience, the packaging is also easy to stock or hang.

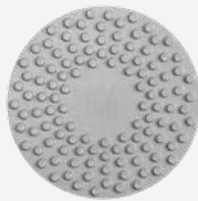

WORLD-CLASS QUALITY AND SUPPORT

Delivering the highest quality is in our DNA. This is why we evaluate every product and ensure that it meets our strict requirements. We also offer a deep resource of industry expertise and know-how from qualified technicians and a responsive team.

EDGING

Reach corners and edges that are difficult to access. Eliminate uneven areas for a polished, professional appearance and a uniform finish.

SPECIAL APPLICATIONS

Our range also includes tools to effectively treat other surfaces, including natural stone, overlays and wooden floors.

THREE PERFORMANCE LEVELS

All diamond tools are now categorised and named by performance level. This ensures that you always get exactly what you need for every application.

ELITE

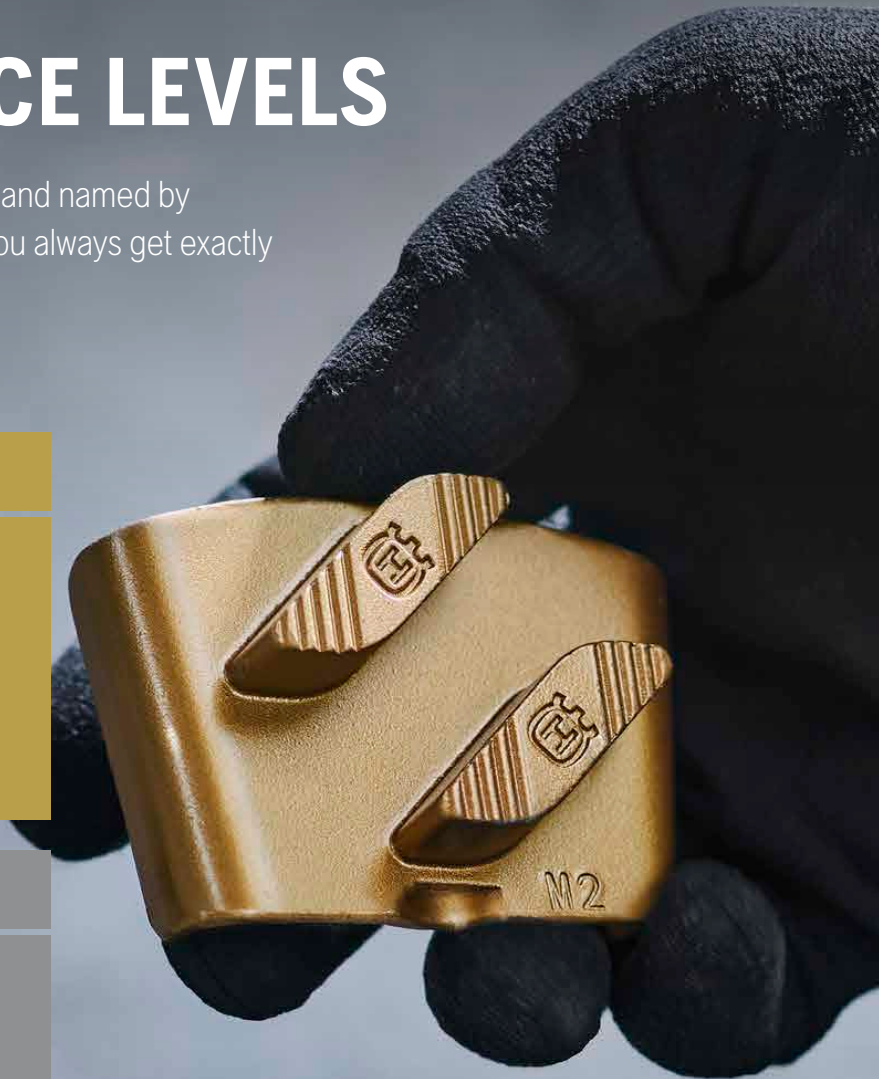

- Recommended for heavy users and demanding professionals
- Longest life, fastest results and optimal for demanding jobs

VARI

- Developed for versatile professionals who work in diverse conditions
- Standard range of applications
- Optimal for moderate professional use

TACTI

- Excellent performance-to-price ratio
- Optimal for “less complex” and less demanding jobs
- Optimal for occasional users

NEW DIAMOND TOOL NAMING SYSTEM

Across the entire range, you'll find the same logical naming structure, colour-coded grit sizes, and marking information – all to make your workday easier. Simply follow the system steps below to learn how to read the new structure.

① TACTI-POLISH ② T ③ T ④ W

1ST

PERFORMANCE LEVEL + APPLICATION

①

ELITE / VARI / TACTI

+

②

GRIND / POLISH / SHAVE

2ND

NAME WITH TWO LETTERS

④

T = TRANSITION

P = POLISH

B = BURNISHING

M = MAINTENANCE

E = ELITE

V = VARI

+

O = OVERLAY

C = CORNER

S = SANDPAPER

F = FENIX OR FLEX

X = XPRESS

2ND LETTER INDICATES APPLICATION

③

T = TACTI

3RD

TYPE OF ACTION

⑤

W = WET / D = DRY

EASY TO CHOOSE. EASY TO USE.

Get in the flow – and stay there. Our range features several improvements that make it easy to choose and use the right tool.

CLEARER BRANDING

A larger logo makes it easier than ever to identify Husqvarna products.

THREE PERFORMANCE LEVELS

Expect the right performance for each job. Choose from 3 clearly marked performance levels to find the perfect tool for your needs:

ELITE series
VARI series
TACTI series

SIMPLER PRODUCT NAMES

One straightforward naming system has been applied across the entire range, clearly indicating each tool's performance level, application, and action.

PLASTIC-FREE PACKAGING

All diamond tools are now packaged in cardboard. This ensures that all tools are protected, while reducing the use of plastic and waste at the construction site.

CONSISTENT COLOUR CODING

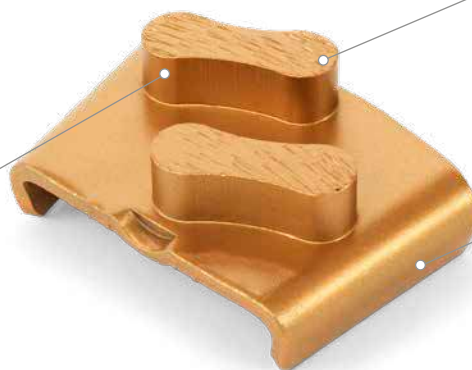

The grit sizes for all metal and resin tools are now indicated by a single colour-coding system.

CONSISTENT TOOL MARKINGS

Consistent marking information on the tools gives you all the information you need at a glance.

QUALITY ASSURED AT EVERY STEP

All our diamonds are custom made to meet the specific needs of each application. They are then tested and graded at our own sophisticated R&D laboratories. Every step, from purchasing to production to analysis, is overseen and quality assured by our own in-house team of diamond experts.

EZCHANGE™ ATTACHMENT SYSTEM

Minimise interruptions: All metal tools (and ELITE resin tools) now feature the patented EZchange™ attachment system.

EZchange™ ATTACHMENT SYSTEM: TOP 5 REASONS

Here are the top five reasons why the EZchange™ attachment system is best for your business.

1. LONGER LIFE & HIGHER PERFORMANCE

The EZchange™ series gives you the optimum ratio of lifespan to performance – no compromises. In addition, all our tools are manufactured using only the most sustainable raw materials and are cobalt-free.

2. WIDER RANGE OF APPLICATIONS

The ELITE-GRIND EZ series has a tool for all types of concrete floors, from extremely abrasive to the hardest concrete.

3. EASIER TO ACHIEVE GREAT RESULTS

Because the tools' segments cover a wider surface area, scratch patterns are more consistent. This makes it easier for less experienced operators to achieve great results when refining or polishing.

4. BETTER HEAT MANAGEMENT

The EZchange™ tool series is compatible with heat-dispersing Airflow tool holders. Keeping the tools cool reduces the risk of damaging the surface and creating inconsistent scratch patterns. Standard EZchange™ tool holders are also manufactured to efficiently disperse heat.

5. SMOOTHER WORKFLOW

The surface hardness and grit size have been optimised for each tool's intended application. This means you can continue to use the same grit size throughout the entire process within the same tool series, making tool selection easier and more intuitive.

NEED HELP CHOOSING THE RIGHT TOOL?

Achieving successful results with floor surfaces is not only about your equipment, but also about your choice of diamond tools. Knowing exactly which tools and chemicals you need can be a challenge, even for the most experienced floor specialists.

Use the Husqvarna tool selector to easily select, recommend and purchase the right diamond tools for your surface preparation and floor treatment projects.

WHAT?

Think of the tool selector as your digital assistant. It brings together our extensive application knowledge and diamond tool expertise in one place, to pinpoint the optimal set of diamond tools and chemicals needed for your specific job.

Simply enter information about the material, finish, surface size and equipment to find the tools and chemicals you need to get the best results for your project.

WHEN?

Estimate and quote projects more accurately by specifying all products needed at each step of the process, from grinding to polishing and cleaning.

WHY?

Save valuable time, reduce costs and be more productive. It only takes a few steps to see what your job needs, so you can be sure of leaving behind the best possible results on every floor, every time.

NEW TOOL RANGE LINE-UP

HANDHELD TOOLS

Our cup wheels and resin tools for handheld and angle grinders are used for everything from floor coating removal to grinding and polishing different types of concrete and natural stone. The full range has been streamlined for removing, grinding, and polishing. Names combine the level of performance (ELITE/ VARI/ TACTI) with the shape of the diamond segments (Arrow, Double Row, Turbo, Single Row, and Spiral).

546 40 49-81	ELITE-GRIND TRANSITION	180	200	5/8-11 THD

HUSQVARNA VARI-POLISH VC D

The Vari-Polish VC D are diamond-infused triangle pads, ideal for use with handheld machines. The complete range of pads ensures that you can maintain a consistent floor level throughout. The triangular shape of the pads allows you to grind right to the edge of corners, leaving no area untouched.
