A close-up photograph of a light-colored wooden floor with a prominent grain pattern. In the upper left, a black chair leg is visible. Next to it is a clear glass filled with water. A white rolled-up document or blueprint lies on the floor. The scene is set against a plain, light-colored wall.

For wood,
the natural
choice!

FLOOR[®]
SERVICE

Produced by

OVERMAT
THE FLOOR TECHNICIANS

Hardwax-oil Classic

Floorservice® hardwax-oils have built an excellent reputation. The Floorservice® hardwax-oils ensure every wooden floor a lasting natural look. The carefully composed mixture allows the oils to penetrate deep into the wood, without blocking the pores. This allows the wood to keep breathing and the wood retains its natural structure and colour because no top layer is formed. Every floor that is finished with Floorservice® Hardwax-oil Classic is guaranteed to be highly resistant to wear and is also water resistant since it contains silicid acid. Your floor is protected against stains caused by wine, beer, cola, coffee, tea, fruit juices, milk and of course water (in conformity with DIN 68861, 1A). The Floorservice® hardwax-oils are also resistant to saliva and sweat (in conformity with DIN 53160) and make your floor child friendly since they meet the requirements for children's toys (in conformity with EN 71). In addition to this, the Floorservice® hardwax-oils meet anti-slip standard R9.

The Floorservice® Hardwax-oil Classic meets the VOC-regulation EU 2010.

Floorservice® Hardwax-oil Classic.

Floorservice® Color Hardwax-oil Classic.

Floorservice® Hardwax-oil Classic is available in the following 30 colours. A wide range of colours, from modern to classic, something for everyone's taste.

Description:

Hardwax-oil for all types of parquet and solid floors, on the basis of vegetable oils and waxes. Low usage: 1 litre is sufficient for 12 - 25 m² when using 2 coats.

Coloured Hardwax-oil for all types of parquet and solid floors, on the basis of vegetable oils and waxes. Low usage: 1 litre is sufficient for 12 - 25 m² when using 2 coats.

- 100% natural and aromatic-free.
- High quality hardwax-oil.
- Easy to apply with a mop or brush, and therefore very user friendly.
- Meets the VOC EU regulation 2010.
- Low usage: 1 litre is sufficient for 12 - 25 m² when applying 2 layers.
- Simple maintenance system.
- Enhanced with sillicic acid, which makes it more resistant to scratches and water.

The colours displayed are examples of coloured Hardwax-oil on oak rustic. The look and feel and therefore the end results strongly depend on the type of wood, the sorting and the pretreatment of it. Because wood is a natural product, these colours may vary. We recommend you carry out a test beforehand, in order to determine the colour. * Only available in Floorservice® Profiline.

Profiline UV Products for industrial use

Besides the oxidative drying oil products, Floorservice® offers the wood processing industry a wide range of high-quality UV-drying products, including UV-oil and UV-lacquer. Depending on your production method, these products can either be applied by use of a drum-roller or spraying installation.

The range of Floorservice® UV Products consists of a wide choice in trend colours and effects. The result is a durable finish, whereas the cured surface is free of Volatile Organic Compound emission and therefore safe for health and environment. Floorservice also offers a range of additional cleaning and maintenance products

- Wide range of UV products, including UV-oil and UV-lacquer.
- Suitable for the production of large amounts of sqm on UV installations.
- High production speed.
- Treated parts can be packed directly.
- From an ultra matte look to a high gloss surface.
- Additional maintenance programme.
- Safe for health and environment.

Nature Protect

At last a product that retains the colour and look of the wood. With Floorservice® Nature Protect you create an ultra matte floor with an unfinished effect and without a visible building of layers.

This water-based lacquer protects the natural colour and structure of the wood, while benefiting of a high grade of protection, just like you're used to with Floorservice products.

With the additional maintenance product Nature Care the ultra matte and natural look of the floor will remain in tact.

Be aware: Nature protect is also available for industrial use as a UV drying product and/or for drum- and spray installations.

Prime® Design Line

Prime Old Grey / Prime Old Black

Floorservice® Prime Old Grey is a pre-treatment and aging product that creates a weathered and naturally grey look on oak. Prime Old Grey is available in three types, I, V en X. These different types each give a more or less intense grey shade.

Prime Old Black creates a black coloration of the oak. Both products need to be finished with one of the Floorservice Hardwax-oil colours.

Floorservice® oil suitable for outdoor wood

The garden is becoming more and more an extension of your interior. The style you so carefully chose for your interior no longer has to stop at the garden door. Wooden patios with matching chairs and tables perfectly match your life inside and even a garden kitchen with wooden elements is no longer a rarity. Just like the wood you have on the floor inside, the wood outside also requires attention and maintenance in order to maintain the natural look and to maintain the balance between inside and outside.

We have developed Floorservice® Decking oil in order to keep the wood in your garden in the best possible condition. This oil penetrates deep into the (tropical) wood and offers excellent protection against water and dirt. The mild smelling oil does not leave a film but gives your wood a smooth surface. Your new garden wood retains its lively look but you can also transform old, faded wood to its original colour and brings back the wood's original grandeur.
